

Tools for System I, Power I, IBM I on Power, iSeries, and AS/400.

#### Tools

- \*SQL
  - Need to learn?http://www.w3schools.com/sql/default.asp
- **★**Rational Developer for i 7.5
  - SEU doesnt support the latest RPG enhancements
- \*Google

#### Tools

\* STRSQL

**★** SELECT \* FROM tickets

- **★** SELECT distinct(zztruck)
- **★** FROM tickets
- **★** ORDER by zztruck
- **★** SELECT zzticket
- **★** FROM tickets
- **★** WHERE zztruck like 'TIM TRUCKING%'

# Tool

**★** CMPPFM

#### Tip

- CMPPFM identifying file changes without a journal
  - Show differences between source files
  - How about regular physical files ?
    - CMPPFM NEWFILE(TMELIB/EPRVTKLG2) OLDFILE(TMELIB/EPRVTKLG)

left

```
IBM COMPARE V6R1M0 080215 05/26/10

NEW: TMELIB/EPRVTKLG2 (EPRVTKLG) OLD: TMEL

LISTING OUTPUT SECTION (LINE COMPARE)

ID SOURCE LINES
I -T001071050001583254/5/2010 SAVAGE 6 6040 J.H.LYNCH & SONS
D -T001071050001583254/4/2010 SAVAGE 6 6040 J.H.LYNCH & SONS
```

right

```
N-LN O-LN
TYPE LEN NUM NUM

X RPL= 1 0000001 0000001

X MAT= 118
```

#### \* QUSCMDLN

Great attention key program

```
Change User Profile (CHGUSRPRF)
                                                  Name, *SAME, *WRKSTN, *SYSVAL
Print device . . . . . . . . . .
                                    *WRKSTN
                                                  Name, *SAME, *WRKSTN, *DEV
Output queue . . . . . . . . . .
                                   TESTX
                                      QUSRSYS
                                                  Name, *LIBL, *CURLIB
  Library . . . . . . . . . . . .
                                                  Name, *SAME, *SYSVAL...
Attention program . . . . . . .
                                   QUSCMDLN
                                                  Name, *LIBL, *CURLIB
                                      *LIBL
  Library . . . . . . . . . . . .
```

F14 = Command string

```
More...

F9=All parameters F11=Keywords F14=Command string F24=More keys

Display Command String

CHGUSRPRF USRPRF(DCTEST)

ATNPGM(*LIBL/QUSCMDLN)
```

**★** DSPPGMREF

- DSPPGMREF Poor man's Hawkeye
  - DSPPGMREF PGM(\*USRLIBL/\*ALL)OUTPUT(\*OUTFILE)OUTFILE(MYLIB/MYREF)

left

Library	Program	TEXT				
		Text				
'Description'						
ZWMSTEST	KCTEST1	create test data from JP receivers				
ZWMSTEST	KCTEST1	create test data from JP receivers				

right

Object Referenced	Library	Source File Name	File Usage	Record Format	Object Type
ZHSBHDX	APLUS2FTS	ZHSBHDX	3	ZHSBHDXR	F
WM670	*LIBL		0		D
XADAT	*LIBL		0		P
ORCTL	*LIBL	ORCTL	1		F
HSBH1	APLUS2FTS	HSBH1	4	HSBHDR	F

#### Record Format level checking

- Every Record format has a unique identifier
  - · Its length
  - Name, number and order of fields
  - Data types, sizes and decimal positions of fields

```
5/26/10
                    Display File Description
DSPFD Command Input
                                             ORHED
           Fields Length Identifier
 Format
                    1457 56000C2055FA4
 ORHEDR
                                             Order Header Forma
               OPDSPPGM
                                        Page/Line
                                                 3/30
                                        Columns
                                                 1 - 78
*...+....5....+....6....+....7....+....4
   APLUS2FJP
   *FILE
   File name in program . . . . . . . . . . .
                                         ORHED
                                         Output
                                         Update
   Number of record formats
                                         Field Count
     Record Format
      ORHEDR
```

- Record Format level checking
  - Does not include
    - TEXT, COLHDG
    - CHECK, EDTCDE, EDTWRD
    - REF, REFFLD (as long as a change here doesnt affect size)
    - CMP, VALUES, RANGE
    - DFT
    - · Key Fields !!
    - Access Path keywords (ie ascending/descending) !!
    - Select / Omit !!
  - There's no need to have a logical by Company and Customer and another one by Company, Customer and Date. Just add date to the first logical and recompile it.

# *Tips* **★** OVRPRTF

- Spooled Files V6 +
  - PDFs OVRPRTF FILE(TEST) DEVTYPE(\*AFPDS)
     TOSTMF('/home/teagan/test.pdf') WSCST(\*PDF)
  - Usual

```
Select files for:
                              *CURRENT
 Name, generic*, *CURRENT.
                                           Name, *ALL, *OUTQ
 Print device . . . . . . .
                              *ALL
 Form type . . . . . . . . . . . .
                              *ALL
                                           Form type, *ALL, *STD
                                           User data, generic*, *ALL
 User data . . . . . . . . . . . . .
                              *ALL
                              *ALL
                                           1-32, *ALL, *ASPDEV
 ASP . . . . . . . . . . . . . . . . .
                                           Name, generic*, *ALL
 Spooled file . . . . . . . . .
                              *ALL
                                           Name, generic*, *ALL
*ALL
                                           Name, generic*, *ALL

  Ending date . . . . . . . . .
                                   *END
                                                 Date, *END
ASP device . . . . . . . . . . . .
                                                 Name, *, *SYSBAS, *CURASPGRP
                                                 *, *PRINT
```

#### ★ Jobs and Logs

- Use named jobs SBMJOB CMD(CALL PGM(X) JOB(somejob)
- Also good for session/workstation lds
- LOG(4 0 \*SECLVL) use on SBMJOB cmd or CHGJOB cmd if adding to a CL program add a MONMSG in case the user doesnt have \*JOBCTL authority.
  - Can be done while a job is active! (best for batch jobs)

#### SBMJOB

- USER Can specify any valid user profile (certain IBM 'Q' names excluded)
- PRTTXT The system will print this text on the bottom of EVERY page
- SCDDTE, SCDTIME Schedule date and time for this job to run
- DSPSBMJOB Specifies if the job will be displayed on WRKSBMJOB cmd
- SBMFOR Specifies which user the job will appear for on WRKSBMJOB

## Handy tools to be aware of

IFS and RPG

http://www.scottklement.com/presentations/RPG and the IFS.pdf

Get data in an external DB from RPG w/JDBC

http://www.scottklement.com/presentations/External Databases from RPG.pdf

Create an Excel spreadsheet from RPG w/ POI

http://www.scottklement.com/presentations/Excel Spreadsheets from RPG with POI.pdf
